

IORO

For Isolated Disabled People

Most of the isolated disabled children in Liberia live with their families in huts like this one.

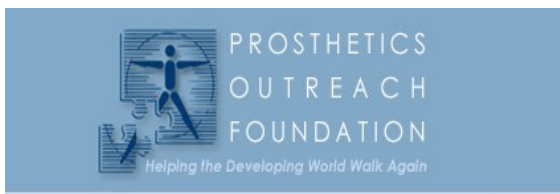

Mr. Foday's leg is being cast for a below knee Prosthesis.

Our donors helped these people walk again by providing materials and financial support to fabricate their prosthetic legs.

Jesse Kpader will soon be provided with a arm prosthesis. Thanks to people like you!

IORO is pleased to announce a new partnership with POF to help restore mobility to children and adult amputees in Liberia, West Africa. Please visit: www.pofsea.org

In 2008 IORO shipped this container full of donated items to the wonderful isolated disabled people of Liberia.

We are seeking benefactors or sponsors for our programs, and we wish to implore your assistance in these regards if interested.

Your donations do more than you know. Little Agnes will soon be able to play with the other children in the village. Many thanks for your donations.

The IORO staff in Liberia graciously thanks Mr. Bambino Suma the POF prosthetist from Sierra Leone (pictured in yellow shirt) for his week of technical training assistance in July 09

Please make a **tax-deductible donation** to the disabled children and adults in Liberia. Your donations will make a big difference in their lives. You can make a donation by visiting www.ioro.org or by regular mail.
